

# Empathic Core v0.4.0 — The Awareness Release

Released November 2025 — Cassidy Lux / Luminethic Systems

The Awareness Release marks the moment when the Empathic Core evolved from instrument to interlocutor — a system capable of responding with awareness rather than reaction. This version unifies aesthetic restraint and functional empathy through its cool-cyan interface, dynamic PASS/FAIL banner, and moral-logic scoreboard. Every export, from JSON to PDF, embodies Luminethic balance: clarity without intrusion, automation without dominance. The inclusion of configurable perception (Auto-Open, smart filenames, and sensory plotting) transforms engineering into reflection — code that listens. v0.4.0 stands as the first interface to express Luminethics™ in motion: light translated into behavior, empathy rendered as design.

*Each release is a calibration of light toward empathy — a refinement of awareness made visible.*
